

eduroam installation guide

The WLAN service 'eduroam' is broadcast in many scientific institutions worldwide (<https://eduroam.org/>), including the DRFZ. An Internet connection can be established using mobile devices such as smartphones, laptops and tablets. The authentication takes place using the DRFZ e-mail address and the associated password. Once set up, an Internet connection can be established anywhere in the world where 'eduroam' is available. The screenshots below are based on Windows 11 and Android version 13.

Installation under Android (Version 13):

1) Select 'eduroam' in your WLAN-settings

2) Enter DRFZ mail address and password

**3) Select certificate:
Do not confirm**

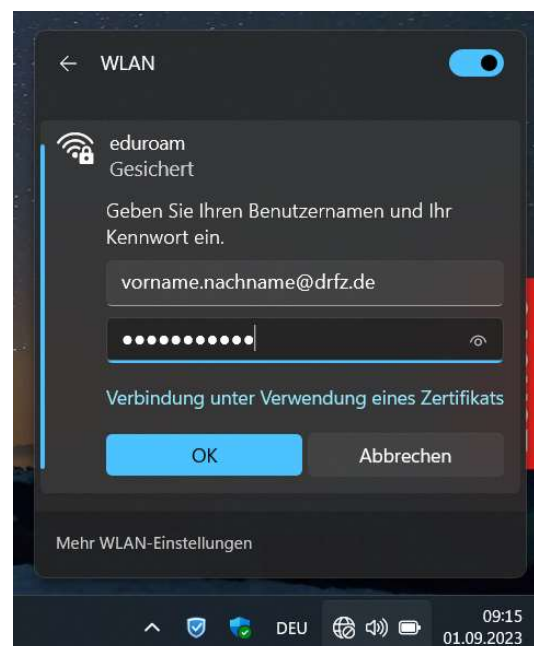

**4) Successfully connected
with ,eduroam'**

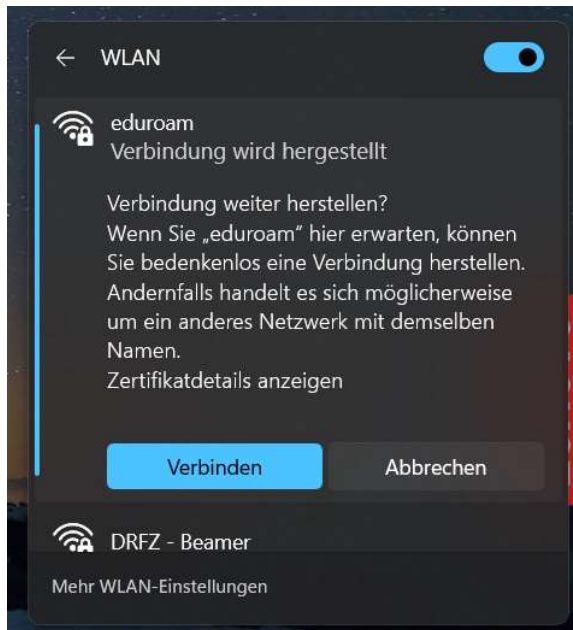

Einrichtung unter Windows 11:

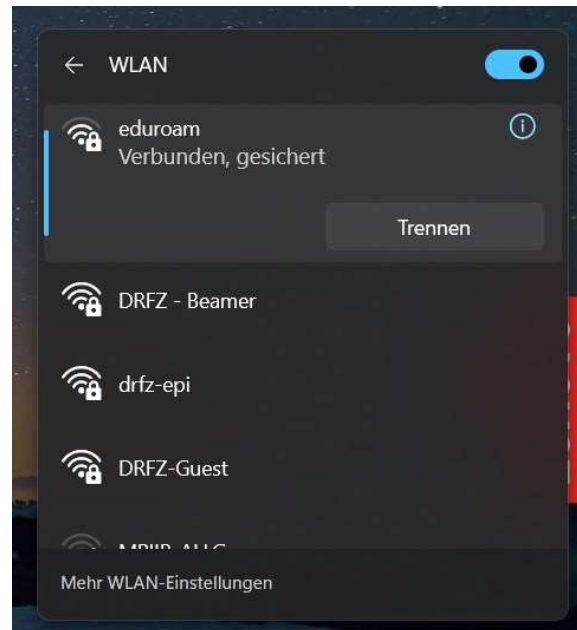

**1) Select ,eduroam'
in your WLAN-settings**

**2) Enter DRFZ mail address
and password**

**3) Establish connection
to ,eduroam‘**

**4) Success – Connected
with ,eduroam‘**
